Exclusively endorsed and recommended by Cummins.

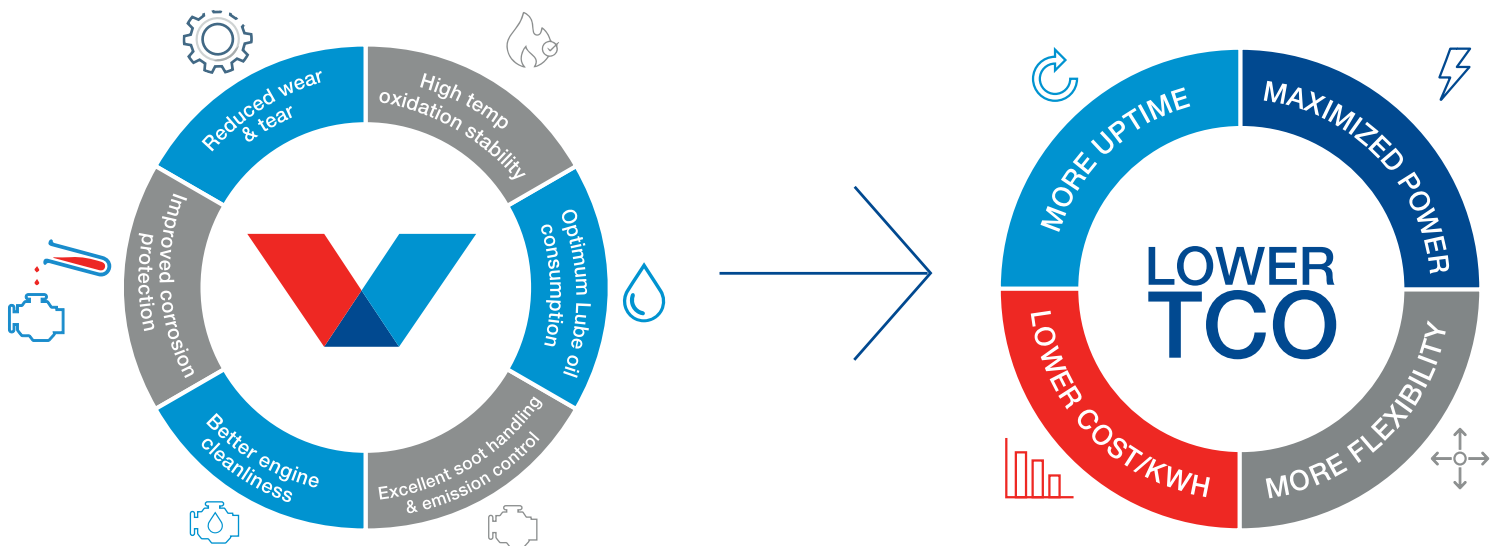

POWER TO PERFORM

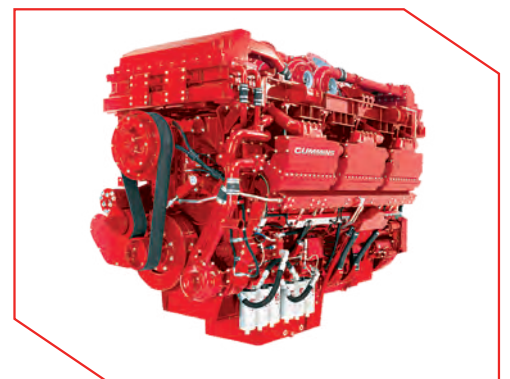

WHY VALVOLINE?

We, at Valvoline are committed to your business. We understand that anything that goes wrong with the performance of your engine have serious consequences. So, reliability is the top priority for us to ensure a smooth and long-lasting performance.

TRUSTED BY THE BEST

The high protection level of our products and the equally high service degree has earned us the trust of major power generator engine manufacturers such as Volvo, GE Jenbacher, Cummins, Wartsila and Waukesha, along with many others. Our collaboration with Cummins goes even further.

THE PREMIUM BLUE™

Premium Blue product range is an outcome of the partnership between Valvoline and Cummins, two of the best-known companies in their respective fields. The jointly developed technology with extensive trials on the engines, Premium Blue portfolio contains a proprietary combination of additives designed to maximize continuous high-power output and to help prevent pre-mature engine wear.

Premium quality

base oils

High performance

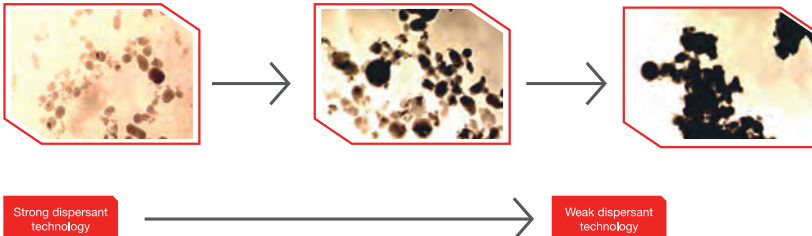

detergent additives

State-of-the-art

dispersancy technology

BEST QUALITY, OUR PRIORITY.

The effect of soot particle growth with different dispersant technology levels.

Guaranteed performance*. Our promise.

Millions of satisfied customers are proof of our promise to provide superior quality products and services. That's why our products come with the trustworthy Valvoline Performance Guarantee.

Valvoline uses the advanced quality base oils and technology to deliver unsurpassed quality products that not only protects your equipment but also boost the performance.

Progressive oil sampling and Drain Extension Program

- Optimized lubricant utilization
- Oil condition and equipment health monitor
- Helps reduce equipment down time
- Helps reduce major equipment failure

*Performance Guarantee is mentioned on the basis that considering our legacy and in-depth lubricant know-how, the Company endeavor to provide superior performance and it is treated to be just a marketing claim.

Premium Blue 7800 Plus

Valvoline Premium Blue 7800 Plus engine oil is designed to provide advanced lubricant performance in modern, low emission diesel engines, including those with EGR, operating under a wide variety of service conditions. The advanced product technology offers a long life and extended drain capability. It strongly resists soot induced oil thickening and keeps the oil flow perfect for lubricating over a very long period. The balanced formulation helps to maximize the engine durability

PERFORMANCE PROFILE

- API CI-4 Plus/SL
- ACEA E7-08
- MB 228.3
- Mack EO-M Plus/EO-N
- CES 20078
- Volvo VDS 3
- Caterpillar ECF-2
- MAN 3275
- Renault RLD-2
- MTU Type 2
- Global DHD-1

Premium Blue 8600

Premium Blue 8600 is an advanced heavy-duty diesel engine oil, formulated with highly stable premium base stocks and specially developed additives. It is designed to provide advanced lubricant performance and protection in modern engines that are fitted with Exhaust Gas Recirculation (EGR) and emissions after treatment devices such as Diesel Particulate Filters (DPF), Selective catalytic reduction (SCR) etc. It is a low Sulfated Ash, Phosphorus, and Sulfur (SAPS) product exceeding the latest diesel engine specification from API, ACEA, and OEMs.

- API CK-4
- CES 20086
- ACEA E9-16
- Volvo VDS-4.5
- MB 228.31
- Detroit Diesel DFS 93K222
- Mack EO-S-4.5,
- Caterpillar ECF-3,
- Renault RLD-4
- MTU Type 2.1
- Deutz DQC III-10-LA

Rig Xpert

Valvoline Premium Blue Rig Xpert engine oil is an advanced engine oil formulated with highly stable premium base stocks and specially developed additives to address the challenges posed by engines of rig application. The advanced technology delivers consistence performance in rig application engine which runs under severe conditions of extreme high heat, dust, high humidity and cyclic loads. Premium Blue Rig Xpert demonstrates unmatched performance to offer enhanced durability and efficiency.

GEO 15W-40 S

Valvoline GEO 15W-40S has been specially developed for stationery engine running on natural gas. The product provides exceptional control of deposits, wear, oil oxidation & oil nitration in both naturally aspirated and turbo charged natural gas engines. The use of Valvoline GEO 15W-40S, which is based on a specially selected additive system, ensures reduction in carbon and ash deposit during service

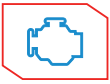

Premium Blue Geo LA 40

Valvoline Premium Blue GEO LA, SAE 40 is a mono-grade gas engine oil suitable for heavy duty non-stop application. The product provides exceptional control of deposits, wear, oil oxidation & oil nitration in both naturally aspirated and turbo charged natural gas engines. The use of Valvoline Premium Blue GEO LA, SAE 40, which is based on a specially selected additive system and special polymers, ensures reduction in carbon and ash deposit during service.

FAQs

Why should you change engine oil per service interval even when running hours are low?

Engine

Service interval is based on extensive field trials to safeguard engine components from excessive wear

Protection

Contamination happens, leading to change in original characteristics and compromise on protection

Slow oil flow

Lighter elements evaporate, making oil flow slow

Corrosive

Oil gets corrosive and thick because of oxidation

Why should you use genuine engine oil?

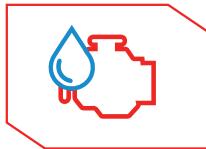

Often you are not able to see the impact of inferior quality oils right away. What may seem like a good performing engine may already contain harmful contaminants that cause corrosion, rust, wear etc.

When the problems become visible it may be too late or very expensive to bring the engine's performance back to normal. Therefore, it is always advisable to stick to high-quality genuine engine oils for maximum protection.

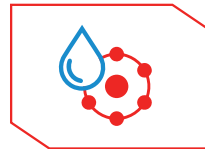

Valvoline Engine Oil is:

Jointly Developed
with Cummins

Extensively tested on
different engine platforms

Use of premium base oils,
special detergent and
powerful anti-oxidants.

What goes inside, Reflects outside.

Valvoline has been working on engines as long as there have been engines to work on. We have always been at the forefront of developing high-quality lubricants that help the engine reach its maximum potential. Through extensive R&D, we make sure our oils work as efficiently as you need them to.
